

Vision 2025 Public Comments

May 10, 2007

- I would like to see a public notice of Vision 2025 meeting dates, places, and times in the Mercury or on the radio.
- The moratorium is being proposed to preserve the process and make the work of this committee valid. Without the moratorium many of these guide lines or regulations will become moot before the new 2025 process is complete. All five ideas that Monty brought up are exciting. They are great ideas. The public forum is especially important. The public needs to be aware of the process as well as the conclusions. Policy R2-2, why are we taking out language encouraging efficiency?
